Q & A

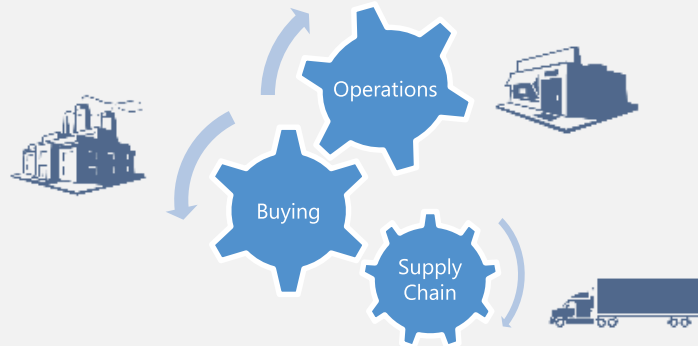

You may not know - Microsoft has large industry products/ solutions and consulting practices

Retail is one of the largest Industry Practices

Vertical industry enterprise process experience

Largely covers Retail & Hospitality

Direct relationship with 13 of global top 20 retailers

Fly **222** million passengers.

Build **6** million automobiles in the United States alone.

Serve **27** billion meals.

Sell **16** billion cans of soda.

Make more than **4** billion cups of coffee.

TESCO
coles

HYATT
Coca-Cola Enterprises Inc.

starwood
Hotels and Resorts

Levi's

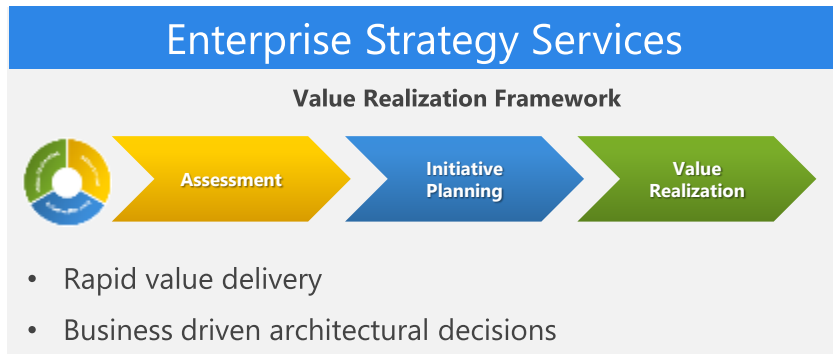

To better serve our clients we needed Business Capability reference model

Business Capability Reference Model

Key Requirements

1. Credible
2. Standard [schema]
3. Multiple industries

Selecting a Partner Organization

Key Requirements

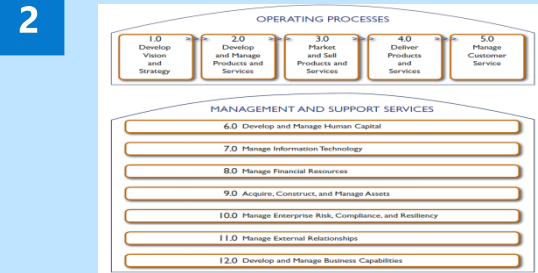

- 1 Credible
- 2 Standard [schema]
- 3 Covering number of industries

Matching Requirements

- 1 550+ Member Companies
...from 45 industries
...and all major geos
...69% larger than \$1B
All major consultancies use APQC

- 3 11 industry vertical-specific PCFs
+ Cross-industry PCF
Benchmarking
Knowledge base
Licensing agreement

"Small" problem – no Retail-specific PCF available

Microsoft and APQC combined expertise to build Retail PCF

Retail industry expertise

- Seasoned Enterprise Architects driving development
- Network of SMEs providing feedback (EPG, Services, PG)

Frame and process expertise

- PCF owners working on alignment , cataloging, cross-checking, etc.
- Formal membership review process

Challenge - Mismatch of Objectives

Key Objectives

Normalization to establish cross-industry standard structure and nomenclature

Firm top-down structure and MECE to ensure singularity and uniqueness

Differentiation to emphasize retail industry specifics

Flexibility to drive competitive differentiation within retail industry

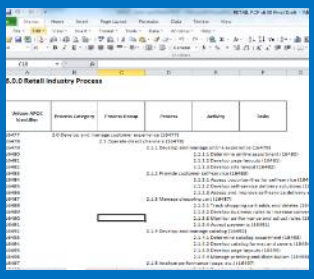

Primary Usage

Benchmarking and analytics

Rapid value realization through scenario enablement
Solution mapping and definition

Breakthrough in Thinking – Converge on Process/Activity Level

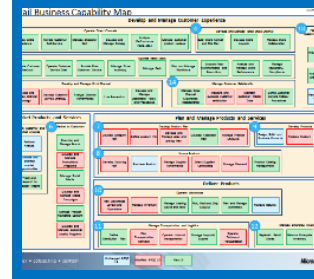

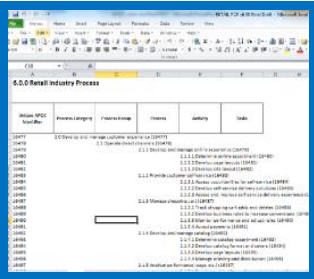

APQC
Cross-industry
PCF

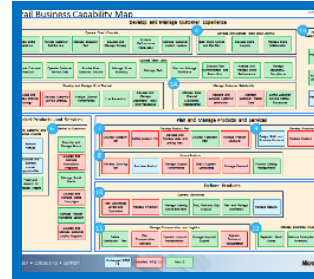

**Convergence and
Alignment**

**L3/L4
(Process/Activity)**

Better Together

Win-Win

Putting PCF to Work

Example 1: Microsoft Value Realization Framework (VRF)

Damir Vrankic
 Director Enterprise Strategy Program

EXAMPLE 1 – Rapid value realization through scenario enablement

BUSINESS SCENARIO: Shop Anywhere – Fulfill Anywhere

Key Challenges

- Inventory Level Integration
- POS log latency
- Labor forecasting and Workforce planning
- Available To Promise across the channels
- Consistent Customer profile across channels

Enable desired multi-channel customer shopping behaviors including:

- Order online – pick-up in store
- Buy in store – drop-ship from warehouse
- Buy online – return in store

Business Scenario (NARRATIVE)

John is a sales executive at a software company, who started out as a systems engineer. A true technophile, John likes to have the latest and greatest consumer electronics. Unfortunately, all of the wireless devices he and his family have acquired don't easily share digital media like music and movies. He's decided it is time to invest in an integrated system for his home.

<The Magic Happens>

John was able to order a new integrated media system online, have it delivered from the local store, and installed by an expert the same day. That weekend John was able to view digitized videos of his family while his children streamed a new movie.

Shop Anywhere – Fulfill Anywhere

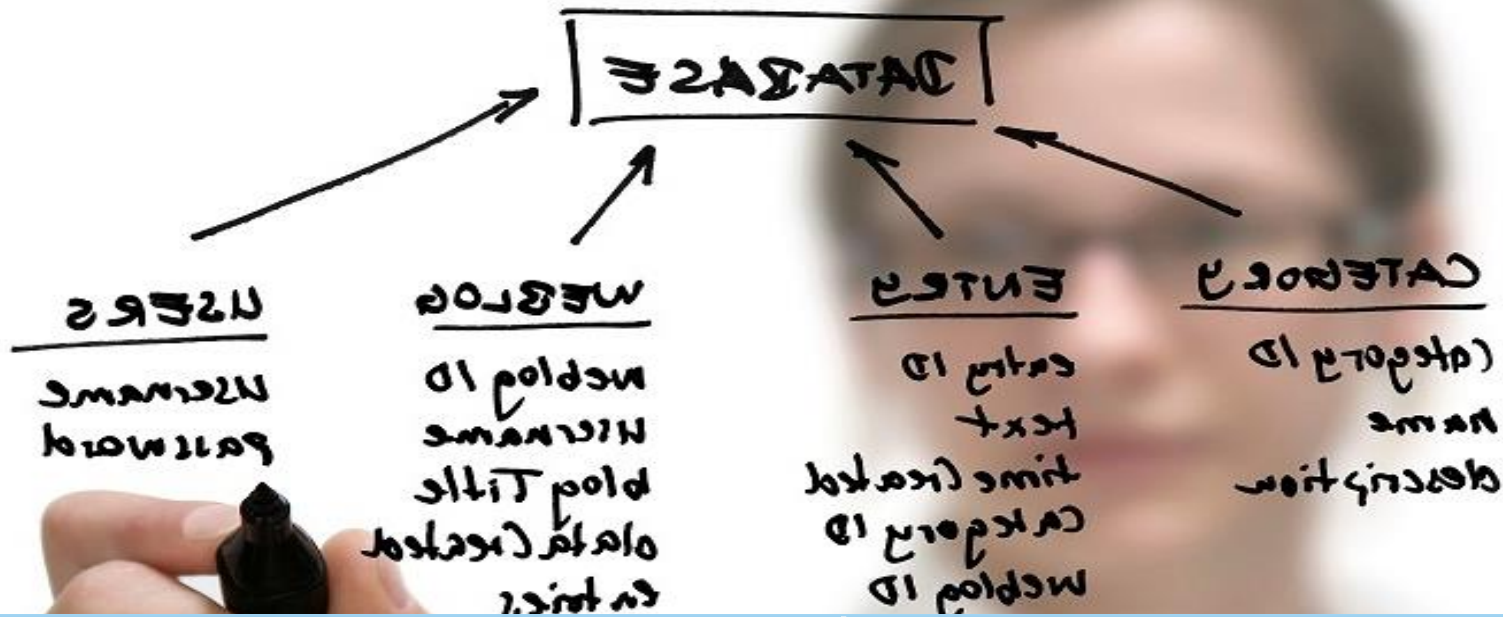

Enable Omni-channel customer shopping behaviors including

- Order online – pick-up in store
- Buy in store – drop-ship from warehouse
- Buy online – return in store

Business Capabilities*	Requisite Capability Level
5.1.2 Manage inventory(16683)	Defined
2.3.6 Plan and manage workforce (16552)	Defined
2.3.4 Manage store inventory (16539)	Defined
5.1.4 Pick, pack, and ship (10356)	Defined
2.1.3 Manage shopping cart (16487)	Defined
Individual Competencies	Requisite Proficiency Level
Consultative selling	Knowledge
Customer service	Knowledge
Computer skills	Knowledge
Complex problems solving	Awareness
Technology Capabilities	Requisite Maturity Level
Reporting and Analysis	Rationalized
Integration	Rationalized
Line of Business Platform	Rationalized
Custom Development	Rationalized

High PRIORITY	INNOVATION		Microsoft Services Enterprise Strategy	
	BUSINESS LED	IT LED		
AFFECTED ROLES				
Role	Type	Responsibilities		
Store Customer Service	Human	Returns and adjustments		
Back-room Stock Clerk	Human	Monitor Sales Floor Inventory		
Warehouse fulfillment clerk	Human	Pick and Pack online orders		
Inventory management	System	Manage store/DC/FC inv.		
Order management	System	Manage online orders		
TYPICAL BENEFITS				
Benefit (organization)	Type	Key Performance Measure		
Revenue growth	Financial	Revenue per customer		
Online shopping card conversion	Quantifiable	Conversion rate (%)		
Customer satisfaction	Qualitative	Relative scale or %		
Customer loyalty	Quantifiable	Shopper frequency		
TYPICAL RISKS				
Risk	Probability.	Impact	Strategy	
Inventory outage	High	Medium	System	
Decreased productivity in the store	High	Medium	Process definition	
IT system changes not provisioned on time	High	High	Initiative planning	
PRODUCTIVITY REVENUES 		STRATEGIC HIGH POTENTIAL KEY OPERATIONAL SUPPORT
