Research project structure

APQC OSBC research projects are designed to collect a wide variety of information about your entire organization, with a specific emphasis on the particular business entity for which the research is being collected.

Each survey is divided into a number of sections, separated by a block of introductory text. The first section contains questions about your organization as a whole. The second section contains general questions about your particular business entity. Each of the subsequent sections of the research project presents questions about specific processes and activities in your business entity. Each of these process-specific sections corresponds to APQC's [Process Classification Framework](#).

Before each section containing process-specific questions, you are presented with a list of components of the PCF. This list identifies which components of the PCF are addressed by this particular section of the research project. The numbers in the list correspond to the PCF's unique numbering scheme. Questions within the section will address specific activities for the stated component of the PCF.

Navigation, saving results, and submitting a survey

The survey is presented in pages. Each page has at least one question on it. Each question on each page should be answered. A survey may also have a question that must be answered in order to proceed. Required questions are identified by the word "Required" in red letters.

Use the buttons at the bottom of each page to navigate throughout the survey. To avoid data loss, do not use the browser "Back" and "Forward" buttons to navigate through the survey. As you navigate through the survey using the "Back" and "Forward" buttons, your data are saved to APQC's secure servers.

The progress indicator at the bottom of each page displays a bar graph and a percentage that indicate your progress in navigating through the survey. The progress indicator does not account for completed questions, only for your relative position in the survey.

To exit the survey before you have completed all questions, click the "Save" button at the bottom of the survey page, then close your browser. The system will present you a link to your particular instance of the survey. Use that link to return to the survey at any time.

Once you have completed the survey, click the "Submit" button on the last survey page. By submitting your survey results, you will notify APQC that your data are ready for validation. You will not be able to create, review, update or delete your answers after you have submitted the survey, so ensure that you have accurately documented your answers before you submit.

Cookies, one browser

The APQC OSBC survey tool uses a "cookie" to associate you to a particular survey instance. Your cookie is unique to the computer you used to start the survey and is the only key that you have to access your data. Should you lose your cookie, you will be unable to complete the survey and will need special assistance from APQC. Do not delete your APQC cookies until after you have submitted your survey data.

Because this cookie is unique to the computer you used to start the survey, other users will be unable to contribute results and data to the survey unless they have physical access to the browser you used to start the survey.

Visit the [Browser Setup](#) page for more information about configuring your browser to use cookies.

JavaScript

The APQC survey application uses JavaScript for enhanced validation and usability features. In order to complete these surveys, you must use a browser that supports JavaScript, and you must have JavaScript enabled. Visit the [Browser Setup](#) page for more information.

Printing

To print a copy of the entire survey, you should use the "Preview" version of the survey. This view consolidates all of the questions associated with the particular survey onto a single printable browser page. No answers or personal data are contained on the "Preview" version of the survey.

As you navigate through the survey, you may print each page to record your answers. There is no facility to review all of your answers on one page.

Definitions

Each survey has a set of definitions associated with it that are unique to the process grouping covered by the survey. Throughout the survey, questions may have links to survey definitions.

Accurate results depend on a common understanding of the terminology used across survey respondents, so take special care to review the definitions in the glossary thoroughly. Common terms may be defined differently than you expect. When in doubt, contact APQC for guidance.

Reasonable numbers

The survey asks for a number of detailed pieces of information. If you do not have the exact information that a question asks for, please provide a reasonable approximation. If you cannot provide a reasonable approximation, please leave the answer blank. If you are not sure, contact APQC for guidance.

Reporting period

All questions in the survey, unless expressed otherwise, request data from the last complete fiscal year of your organization's or business entity's operations. Please be sure to provide the end-date of the fiscal year for which you are providing data. If you have any questions about the reporting period, please contact the OSBC help desk. (Contact information is provided below.)

Question numbers may skip

Occasional changes to the survey may result in the addition or removal of questions. Due to this activity, the question numbers in the survey may occasionally skip one or more numbers. Furthermore, some surveys will hide questions depending upon answers to previous questions. If you have any questions about the order of questions in the survey, please contact the OSBC help desk.

Contacting APQC with questions

For any questions regarding the survey mechanics, the survey content, or general survey inquiries, please contact the OSBC help desk via telephone at +1.800.776.9676 (toll free, U.S. only) or +1.713.681.4020, or via e-mail at osbc@apqc.org.

General Background Questions

Regarding your entire organization

The questions on this page should be answered for the entire organization, including **all business entities** as well as the corporate headquarters.

Please provide your value responses with no currency marks, thousands separator, or other formatting. Also, a period should be used for a decimal mark, not a comma (e.g. **1325.23**, not \$1,325.23).

*200.0010 Please indicate the currency (e.g. U.S. Dollar, Euro, Japanese Yen, etc.) used for monetary responses in this survey. *This question must be answered in order to proceed to the next page.*

200.0120 Which of the following terms best describes the market conditions in which your business entity mainly operates? (Select only one.)

- Relatively new, emerging market
- Growth market
- Mature market
- Generally in decline

200.0130 Which of the following best describes how your organization analyzes the behaviors of its key customers (eg. hiring managers, candidates, active employees retires)? (Options are listed in increasing order of maturity. Please select the highest level of maturity that your organization has achieved. Select only one.)

Segmentation (when done) is against a single variable. Most behavior analysis is based on internal experience and knowledge of past patterns.

Business units develop segmentation models and simple patterns of behavior based on account history and demographics.

Enterprise segmentation models are based on multiple variables; some predictive modeling is used.

We have a holistic view of data with robust micro-segmentation and models to predict behavior patterns, which are shared across the enterprise.

We use advanced multidimensional segmentation to identify customer value (e.g. satisfaction ratings, retention), while real-time self-adjusting algorithms drive insights into response patterns.

200.0140 How are customer (eg. hiring managers, candidates, active employees, retirees) interactions tracked, monitored and measured? (Options are listed in increasing order of maturity. Please select the highest level of maturity that your organization has achieved. Select only one.)

Some efforts are made to track customer interactions and understand pain points. Customer activities are logged by channel.

Departments or business units are responsible for broad tracking and analysis of customer interactions.

We have an enterprise-wide program to track interactions and evaluate outcomes. We are able to understand all customer activities across channels in a single view.

Enterprise wide, we track customer interactions across channels, and we use this as an input to continuous improvement. Customer activities on one channel are visible to all channels in a timely manner.

All activity details and communications, including teaming with external partners, are available across and between all channels, such that we can seamlessly monitor customer interactions across our entire enterprise.

200.0150 Which of the following does your business entity regard as its top three business objectives? (Select up to three.)

200.0200 What is your assessment of your business entity's overall performance relative to industry peers?

- Top Quartile
- Middle Half
- Bottom Quartile

200.0210 Which of the following best describes your organization's maturity with regards to information availability and analysis capabilities? (Options are listed in increasing order of maturity; select the option that best describes your organization's maturity.)

We don't have regular access to data beyond basic transactions. Data is stored in spreadsheets or system extracts. Analysis is not performed on a regular basis and decisions are based on instinct or anecdote.

Data is in department or line-of-business silos. Insight generation is only performed on an ad hoc or periodic basis. Decisions may be supported by data, but are primarily based on past experience.

Structured operational data is available and may include some basic external data. Insights are generated at department or line-of-business level. Decision making is focused on analyzing past actions and consequences.

Traditional and unstructured data is integrated and available from enterprise sources as well as some external data. While data is available to many people based on their roles and needs, using it might require some technical assistance. Decision making involves historic analysis and predictive algorithms.

Real-time internal and external data is readily accessible across the enterprise based on need. Information is shared extensively across the enterprise. The data is integrated real-time and users can access, manipulate and visualize data on demand. Data-driven decision making is part of the organization's culture.

This concludes the background and demographic component survey.
